MOTIVE POWER BATTERY POST DRILL BIT

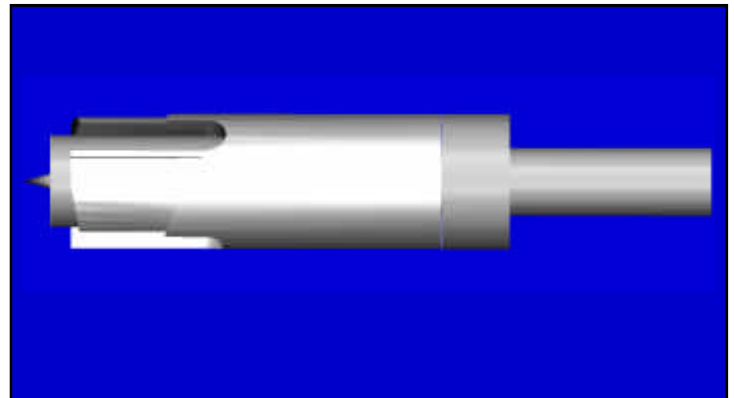

Part Number:PD1X3

Southwestern Battery Supply has recently began manufacture of a Motive Power drill bit, for use in removal of battery cables as well as cell inter-unit connectors.

Our battery post drill bit utilizes the features that make it one of the best Motive Power battery post drill bits available.

CNC machined of high-grade tool steel, then hardened to insure a long service life. Unlike our competitors, our bit features three raised cutting edges which if ever needed can be re-sharpened. Extending the edges above the bit body helps to prevent dangerous binding of the bit while in use, which often results in uncontrollable twisting of the drill motor.

- Hardened Tool Steel
- .50 (1/2") Drill Shank
- Two Spring Included (one strong - one soft)

- Three Cutting Heads
- .70" Battery Post
- Quantity Pricing Available

- Non-binding Cutting Heads
- Easily disassembled
- Up to .74" Drill Depth
